

without you  
(*words and music Lee Maddeford*)

empty silence in my head  
no one here beside me  
can't believe that the past is dead  
got to try and see it clear

strangers look into my eyes  
they don't see what's happened  
visions of another life  
coming forth to haunt me

now what am I gonna do tonight  
what am I gonna do tonight  
without you

silent movies in my bed  
try not to think about it  
all the words that we ever said  
float inside my dreams

now what am I gonna do tonight  
what am I gonna do tonight  
how am I gonna get through the night  
how am I gonna get through the night

#### REFRAIN

without you  
out beyond the rain  
beyond the shadows of the fallen skies  
try to see it without the pain  
gonna blow my cares away

without you  
on the rising tide  
beyond the shadows of the failing moonlight  
try to see it from the other side  
gonna blow my cares away

remember me

looking down on a crowded lane  
looking past the movement  
try to look beyond the pain  
try to see it clear

now what am I gonna do tonight  
what am I gonna do tonight

how am I gonna get through the night  
how am I gonna get through the night
